ABOUT SPRINGFIELD MARINE

Springfield Marine Company pioneered the marine seating market and today is a leading provider of marine seating, seating & table hardware, and boarding ladders to customers around the world. The company continues to develop products to meet the growing needs / wants of boaters, while maintaining the highest industry standards for safety, durability, and comfort. To ensure quality and customer satisfaction, Springfield Marine products meet the following testing standards and certifications:

- **American Boating & Yacht Council (ABYC) Standards (USA)**
- **Certificate of type approval of China Classification Society (CCS)**
- **DNV Business Assurance Management System Certificate (DNV)**
- **Type Approval Certificate (BV)**
- **EC Type-Examination Certificate**

Regardless of brand, all electrical and/or electronic components are covered only for one year from date of sale to first use purchaser.

Springfield Marine branded products are backed by the following warranty terms:

HARDWARE - 5-Year Limited Warranty: Pedestals, Mounts & Accessories

For a period of 5 years from the date of sale to the first use purchaser, Springfield Marine Company will replace product which proves to have manufacturer's defect in materials and workmanship under normal and proper usage.

SEATING - 1-Year Limited Warranty: Upholstery, Cushions & Electrical Components

For a period of 1 year from the date of sale to the first use purchaser, Springfield Marine Company will replace any upholstered product which proves to have manufacturer's defect involving vinyl, fabric, leather or foam components in materials and workmanship under normal and proper usage.

SEATING - 5-Year Limited Warranty: Frame & Substrate

For a period of 5 years from the date of sale to the first use purchaser, Springfield Marine Company will replace any seating product which proves to have a manufacturer's defect involving frame or substrate components in materials and workmanship under normal and proper usage.

Shark Seating branded products sold into the recreational boating market are backed by the following warranty terms:

HARDWARE - 3-Year Limited Warranty: Pedestals, Mounts & Accessories

For a period of 5 years from the date of sale to the first use purchaser, Springfield Marine Company will replace product which proves to have manufacturer's defect in materials and workmanship under normal and proper usage.

SEATING - 1-Year Limited Warranty: Upholstery, Cushions & Electrical Components

For a period of 1 year from the date of sale to the first use purchaser, Springfield Marine Company will replace any upholstered product which proves to have manufacturer's defect involving vinyl, fabric, leather or foam components in materials and workmanship under normal and proper usage.

SEATING - 3-Year Limited Warranty: Frame & Substrate

For a period of 5 years from the date of sale to the first use purchaser, Springfield Marine Company will replace any seating product which proves to have a manufacturer's defect involving frame or substrate components in materials and workmanship under normal and proper usage.

Shark Seating Product – Commercial & Government Markets

Shark Seating branded product sold into the commercial or government markets will vary depending on application - Please see your Shark Seating salesperson.

Limitation of Warranty

This warranty does not extend to consequential damages. Some states do not allow the exclusion or limitation of incidental or consequential damages, so the above limitation or exclusion may not apply to you. Springfield Marine Company is not liable for improper installation or improper use of the product or any failure or problems from lack of reasonable maintenance, racing activities, or commercial applications. These products are not designed or warranted for racing or high-performance use. Commercial use restrictions apply - contact for details. This warranty shall be considered void if the seat or any accessory/ equipment has been altered, modified, changed, or reworked, subjected to abuse, neglect, or accident, including abnormal use, and if the seat is installed in a manner that would subject the seat to abnormal use. The warranty shall be considered void if mixing Springfield Marine Company components with parts that are manufactured by any brand other than Springfield Marine Company. The foregoing is the only warranty or representation made, express or implied, and specifically, there is no warranty of merchantability and no warranty of fitness for a particular purpose.

To obtain service under the warranty, **a customer must notify our customer service department to obtain a return material authorization number** by sending an email to: warranty@springfieldgrp.com. Customers are responsible for paying return freight as well as the freight on a new order if making an exchange. Springfield Marine Company is not responsible for return packages that are lost or stolen in transit.

Authorized returns must contain the following information on the shipping label:

Seating

Enhance Your Boating Experience with Our Premium Seating Systems! **SPRINGFIELD Marine** understands the importance of comfort in marine seating, whether you're navigating rough waters or fishing in a quiet cove. Our extensive range of seating configurations and options ensure you find the perfect fit.

We prioritize quality, comfort, and strength, offering great value for your seating system. With a wide variety of chairs and an even larger selection of seating hardware, our combinations are unparalleled.

Choosing the right seating hardware to match your chair is crucial. Whether you're opting for one of our seating packages or creating your own combination, Springfield Marine has the right product to meet diverse needs.

For OEM production, we also offer custom seating and upholstery upon request.

ABYC

H-31 COMPLIANT

The ABYC H-31 Standards are rigorous guidelines established by the American Boat and Yacht Council to ensure the safety and reliability of seating systems used on boats. These standards specify the design, construction, and testing requirements to ensure that seating systems can withstand the stresses of regular use, high-speed operations, and rough waters, providing secure and stable seating for passengers. At Springfield Marine, we rigorously test our products to ensure they meet and exceed the ABYC H-31 Standards. This includes subjecting our seating systems to extensive stress testing, corrosion resistance evaluations, and durability assessments to confirm they can handle the demands of both leisure and commercial boating environments. By adhering to these standards, we ensure that our products provide the highest level of safety and performance for our customers.

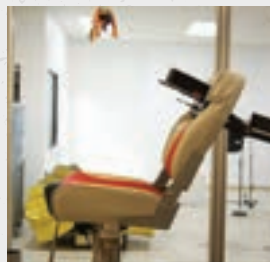

DROP TEST:

9" above seat cushion.
400 lb bag with a 16" diameter dropped 2x.
Remains on seat for 5-min. with no material failure.

PULL TEST:

16" above seat cushion.
• 1st pull: 150 lbs for 5-min., at 30° with no more than 10° permanent deflection.
• 2nd pull: 235 lbs for 5-min., at 50° with no material failure.

ARM REST TEST:

200 lbs of pressure applied to 5° from vertical for 5-min. with no failure and must perform as intended.

ROTATIONAL TORQUE TEST:

• AD (Driver) requires 150 lbs and mechanical interface
• AP (Passenger) requires 30 lbs

CLASSIFICATIONS

AD rating stands for "Accessory Designated" and refers to a classification within the ABYC standards for seating and pedestal systems. An AD rating indicates that the seat or pedestal is designed for use in specific, designated positions on a boat, typically those that are subject to moderate stress and forces during operation. Unlike the AP rating, the AD rating is more limited and tailored to areas that do not require the highest levels of impact resistance. This rating ensures that the seating system is appropriate for its intended location on the vessel, providing safety and durability where it is needed.

AP rating stands for "All Position" and is a classification within the ABYC standards related to seating and pedestals. This rating indicates that a seat or seating system is designed to be used in any position on a boat, including high-stress areas such as helm positions, where greater forces are encountered during operation. Products with an ABYC AP rating have been tested and proven to withstand the rigors of all positions on the boat, ensuring they provide safety and stability regardless of where they are installed.

"B" rating designates seats intended for use in areas of a boat that experience lower levels of stress and impact, such as those not typically exposed to rough conditions or high-speed operation. Seats with a "B" rating are designed to accommodate seated occupants during normal boat operation but are not intended for high-speed or offshore use where greater forces might be encountered. This rating helps manufacturers and consumers ensure that seating is appropriately matched to the intended use and conditions of the boat.

FISH PRO 1 HIGH-BACK MOSSY OAK®

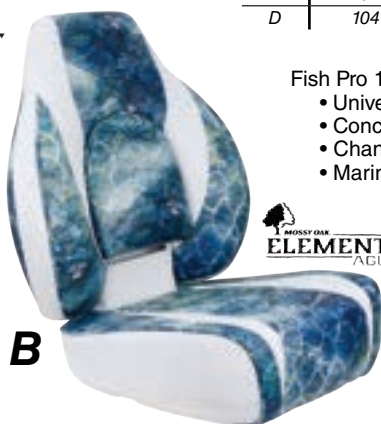

IMAGE	PART NUMBER	DESCRIPTION	PACK QUANTITY

KingPin™

Upgrade Your Boat with **SPRINGFIELD Marine's** KingPin™ Seating System!

Discover the ultimate in safety and reliability with **SPRINGFIELD Marine's** first-generation removable pedestal, the KingPin™. A favorite among boaters, the KingPin™ system features the versatile Hi-Lo pedestal. Enjoy a high position for comfortable fishing or easily switch to the low position for compact storage and maximum visibility while underway. Perfect for fishing trips, leisure boating, and beyond.

Crafted with a 3/4" E-coated steel pin, the KingPin™ ensures a secure fit into the deck base. Choose from corrosion-resistant anodized, e-coated, or polished aluminum posts. Available in standard and threaded styles, both designed for a safe and secure boating experience. Ready to elevate your boating adventures?

System meets ABYC H-31 B Rating.

PRODUCTS IN THE KINGPIN™ SERIES ARE
DESIGNED FOR RECREATIONAL USE ONLY

HI-LO 3-PIECE PACKAGE

Taper-Lock™

Experience Unmatched Stability with **SPRINGFIELD Marine's** Taper-Lock™ System!

Imagine hitting the water with the most stable and secure seating system available. Since 1982, **SPRINGFIELD Marine's** Taper-Lock™ pedestal system has been a game-changer, with over one million units sold! Designed for versatility and unmatched stability, the Taper-Lock™ features a high-strength composite bushing that creates a snug, secure fit in the pedestal base. Plus, the locking tab prevents unwanted turning, keeping your seat firmly in place.

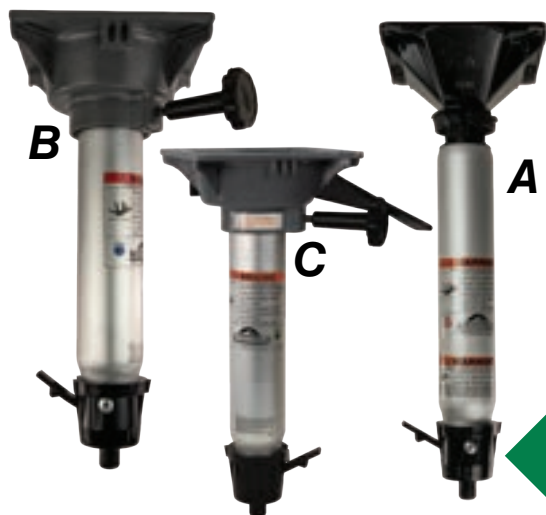

Perfect for fishing boats, the Taper-Lock™ system is trusted by top-name boat builders for its reliability and performance. Whether you're casting a line or navigating open waters, our Taper-Lock™ system ensures a smooth and secure ride. Join the ranks of satisfied boaters and elevate your boating experience.

PRODUCTS IN THE TAPER-LOCK™ SERIES ARE DESIGNED FOR RECREATIONAL USE ONLY

TAPER-LOCK™ SERIES

2-PIECE POST PACKAGE

RETAIL IMAGE	PART NUMBER	DESCRIPTION	DIAMETER	PACK QUANTITY	ABYC

Plug-In™

SPRINGFIELD Marine's Plug-In™ removable pedestal series is designed for high durability and stability, using stainless steel hardware, high-strength aluminum, and engineering-grade plastics. The key features include:

- **Materials and Construction:** The series uses stainless steel, high-strength aluminum, and engineering-grade plastics to ensure the highest quality and durability.
- **Keyed Aluminum Anodized Post:** The high-strength anodized aluminum post fits into the base with inner and outer bushings, providing a clean look and sturdy function.
- **Notched and Keyed Design:** This unique design secures the post against rotation in the base and seat mount, ensuring stability and safety.
- **Stable Seating System:** Once engaged, the Plug-In™ system provides a stable and secure seating solution.
- **Versatility and Popularity:** The interlocking design makes it suitable for both freshwater and saltwater conditions, maintaining its popularity among removable pedestal systems for boats.

The Plug-In™ series is engineered to provide a robust and reliable seating system, ideal for rough marine environments.

Thread-Lock™

SPRINGFIELD Marine initially introduced the Thread-Lock™ as a table system. This innovative approach led to the adaptation of their post-style grill, utilizing the same attachment method. The success of these products paved the way for redesigning the post and base for use as a seating system, integrating a locking mechanism in the seat post to ensure a secure, wobble-free experience for both fishing and underway models. All while not going below deck, the surface mount system allows for easy installation.

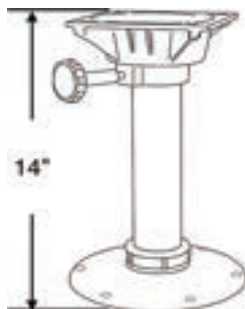

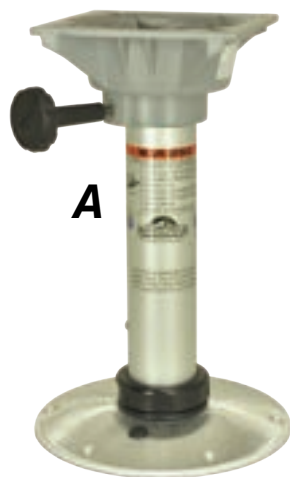

The Thread-Lock™ systems feature interchangeable parts, allowing for the seamless use of seat bases with the grill or table. This versatility makes it an ideal choice for a fishing deck—simply remove the seating post, install the grill or table, and enjoy (note: the seat post will not fit into the table base).

With the Thread-Lock™ system, attaching the post to the base is as easy as twisting in a light bulb. The locking collar provides peace of mind, ensuring that your post remains securely attached to the base.

**PRODUCTS IN THE THREAD-LOCK™ SERIES
ARE DESIGNED FOR RECREATIONAL USE ONLY**

[illegible]

For an even simpler solution, **SPRINGFIELD Marine** offers the Clip-Lock system, delivering enhanced performance and ease of use. The base captures the end of the post, providing the necessary strength to keep it in place during intense freshwater action. To use, simply plug the Clip-Lock into the base. When finished, a simple pull on the post removes it from the base with ease.

2-3/8" Series

SPRINGFIELD Marine's first-generation non-removable pedestal system, the 2-3/8" series, remains highly popular for inland boats. This system features a die-cast base and a 2-3/8" aluminum extruded post, complemented by our renowned Trac-Lock™ slides and swivels. The Trac-Lock™ components, made from aluminum die-cast, powder-coated swivel, and extruded slide plates, ensure a secure connection between the post and seat pedestal.

This series exceeds the ABYC H-31 requirements for strength and durability. It has been rigorously tested both in the lab and in the field, boasting a proven track record of reliability and safety.

2-7/8" Series

SPRINGFIELD Marine's second-generation non-removable pedestal system in the 2-7/8" series is designed for today's larger and faster recreational boats. This system features a heavy-duty base and post, crafted for maximum strength and durability. The base is made from permanent mold AC7A aluminum alloy with an anodized finish, providing superior strength and corrosion protection.

The 2-7/8" heavy-duty extruded post is pressed and hydra-formed into the base, mechanically forming a robust and sturdy pedestal. This proprietary process ensures maximum strength and a secure, reliable connection between the post and the base.

 - **WORKHORSE**
 - **ELITE**
 - **MAINSTAY**

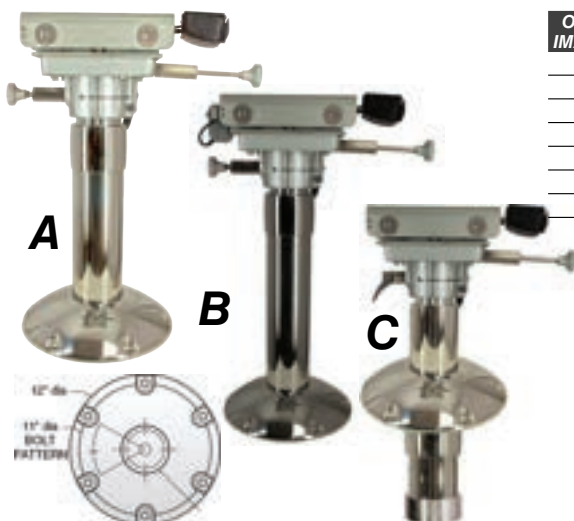

4" Series

SPRINGFIELD Marine introduces the 4" series, engineered for the most demanding work or pleasure boat applications. This heavy-duty series is designed to provide rugged service and wobble-free control, ensuring reliable performance in challenging conditions.

The 4" seat mounts include the Mariner II, Workhorse, and Elite Series. The 4" pedestals are available in the Mainstay and Elite Series, offering both fixed-height and adjustable options in various lengths and finishes. These pedestals are constructed from corrosion-resistant stainless steel or high-strength aluminum, ensuring durability and longevity in harsh marine environments.

Shark Seating

SPRINGFIELD Marine introduces SHARK Seating. A lightweight, affordable, suspension seating system. What does S H A R K stand for?

SAFETY: was the founding premise of Shark, with our primary goal being to reduce the risks to boaters from wave impacts. Our designs are human-centric, designed to work intuitively, ergonomically and in harmony with every aspect of human nature, even in harsh environments.

HONESTY: is a core value: We remain true to our humble, straight-forward and friendly New Zealand origins while emphasizing safety, fun and freedom.

AFFORDABILITY: is our middle name. We make first-class protection accessible to all boaters (recreational, first responder, commercial, and defense) with suspensions that are the most affordable on the market.

RELIABILITY: is a key attribute that Shark emphasizes to meet the needs of our customers and team members. We do this by making elegantly simple and durable products, which are well stocked and supported in every market and sector.

KUDOS: Shark Seating utilizes ergonomic design principles to effectively disperse kinetic energy. Engineered products that are elegantly simple and durable ensure our seating solutions perform reliably across every market and sector.

FLEX suspension range

FLEX provides 225mm of ultra-smooth travel that is completely corrosion-proof, light, and tough.

Combined with our stainless steel shock absorber, there are no pinch points or sharp edges and it will withstand 10g impacts making it safe in every way!

FLEX-pod

Super light and super compact

Only
3.3kg!

225mm

Picture shows **FLEX-pod** fully compressed

FLEX-pod brings 2/3rd of **FLEX** performance but in a package 1/3rd the weight and 1/2 the height. That's 150mm of vertical travel in the smallest possible size to not only save your back but save space and money at the same time.

FLEX

FLEXANITE™

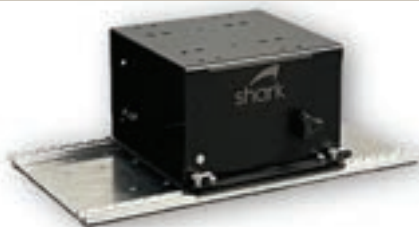

Transforms any seat for a softer safer ride

FLEX-HD

Rated for 10G vertically and 6G (impact) horizontally when used with seatbelts

Mounting Systems

SPRINGFIELD Marine offers a wide range of mounting systems designed for low-profile decks. These systems incorporate features such as both swivel and slide functionalities, making them suitable for passenger and driver's seat positions. Additionally, we provide a variety of recreational systems tailored for Jon Boats and other small crafts.

All our systems are ABYC H-31 A and B rated, ensuring they meet the highest standards for safety and performance.

- 
- A photograph of a white, round, adjustable table mounted on a boat deck. The table has two cup holders and is holding a pair of sunglasses and a yellow drink pouch. A rolled-up blue and white striped towel lies on the white vinyl seating area next to the table. The boat's interior is white with brown vinyl accents. The background shows a body of water and a green lattice fence.

Tables

SPRINGFIELD Marine's tables enhance your on-the-water experience, providing convenience and comfort while onboard. Designed for easy setup during mealtime or snack time, these tables allow you to extend your boating pleasure without needing to go ashore. They are also perfect for setting up games and other activities.

Our tables come in a wide range of styles to suit your needs. For added convenience, all tables are removable for easy storage, keeping your lounging area spacious and free for other activities when the tables are not in use.

The technical drawing shows a top-down view of a boat table with a complex, multi-circular shape. It features several circular cutouts of different diameters. Dimensions are provided in millimeters and inches. Key dimensions include: overall width 209.50mm [8.248"]; overall height 124.44mm [4.899"]; a large circular cutout with a diameter of 76.00mm [Ø2.992"]; and a smaller circular cutout with a diameter of 50.30mm [Ø2.374"]. The drawing also shows a side view of the table, indicating a thickness of 15.00mm [0.591"] and a height of 4.00mm [0.158"]. The table is shown in a light gray color, and the dimensions are labeled in black text.

Our tables come in a wide range of styles to suit your needs. For added convenience, all tables are removable for easy storage, keeping your lounging area spacious and free for other activities when the tables are not in use.

Ski Tows

SPRINGFIELD Marine's ski tow pylons are engineered to provide unparalleled structural integrity, ensuring a safe and enjoyable experience for water sports enthusiasts. These pylons are constructed from high-strength aircraft aluminum, guaranteeing long-lasting durability even in harsh marine environments. The robust design minimizes flex and wobble, offering a stable platform for towing skiers, wakeboarders, and other towable devices. Each pylon undergoes rigorous testing to meet and exceed ABYC and industry standards, providing peace of mind that they will perform reliably under demanding conditions.

In addition to their strength, **SPRINGFIELD Marine's** ski tow pylons feature innovative engineering to enhance their functionality and ease of use. The pylons are designed with secure mounting systems that ensure a firm attachment to the boat, preventing any shifting or loosening during use. This secure attachment is crucial for maintaining safety and performance while towing at high speeds. With **SPRINGFIELD Marine's** ski tow pylons, boaters can enjoy the thrill of water sports with the confidence that their equipment is built to last and perform flawlessly.

INBOARD POP-UP SKI TOW

A

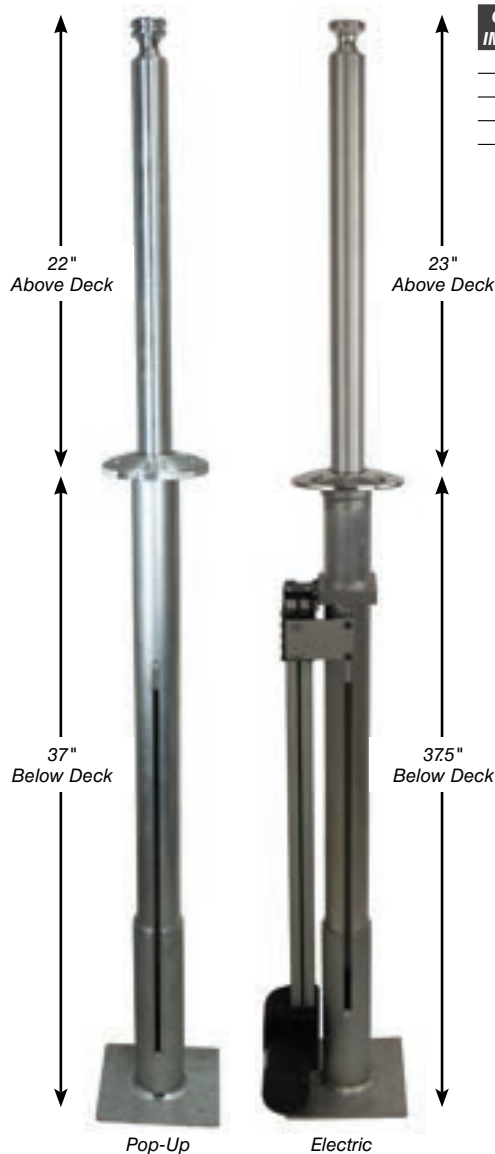

Stows Flush

OEM IMAGE	PART NUMBER	DESCRIPTION	PACK QUANTITY
A	1800090	POP-UP SKI TOW, INBOARD, ROUND BASE	1 BULK

Made from high-strength aircraft aluminum, this single post design conceals neatly away into the deck when not in use and is activated with a single locking feature for easy conversion into ski ready position. Pops up with just a twist and held in position with a spring.

- 2-1/2" above deck, 5-1/4" below deck
- Anodized finish
- Withstands 2000 lbs static load

Ladders

SPRINGFIELD Marine proudly presents our new line of boarding ladders, meticulously designed to offer both durability and versatility. Crafted from either high-strength aluminum or corrosion-resistant stainless steel, these ladders are built to endure the challenging marine environment, ensuring long-lasting reliability. Available in polished or black electroplated finishes, they bring a touch of elegance and modernity to any boat. We offer a range of configurations, including telescopic or fixed step options, with 2 to 5 steps to cater to various boarding needs and preferences.

Our boarding ladders not only provide superior functionality but also adhere to the highest safety standards, meeting the stringent ABYC H-41 guidelines. This compliance guarantees that our ladders are safe, robust, and reliable for all users. **SPRINGFIELD Marine's** new boarding ladders ensure a secure and comfortable experience. With easy installation and exceptional build quality, these ladders are the perfect addition to any vessel, enhancing both convenience and safety for boat owners and their guests.

NEW! Stainless Steel and aluminum, telescoping and fixed boarding ladders available in polished or black electroplated finishes.

- Securing strap included on telescoping models
- Flat treads for added comfort
- Corrosion resistant
- Meets ABYC H-41 standards

Accessories

SPRINGFIELD Marine is renowned for producing some of the highest quality seating hardware in the industry, and we are equally well-known for supplying exceptional boat and trailer accessories. Our products are designed to protect and extend the life of your boat's components while enhancing your boating enjoyment and safety. From practical boat-mounted items like fishing rod holders to premium recreational products such as grills, **SPRINGFIELD Marine** offers a wide variety of accessories to meet all your boating needs.

Our commitment to quality extends to our trailer accessories, which are designed to provide both safety and functionality. We offer practical and easy-to-use products, including portable trailer jacks and a wide range of fully adjustable motor supports. These accessories are engineered to make life easier for trailering, ensuring that your experience is smooth and hassle-free. So explore the diverse range of accessories that **SPRINGFIELD Marine** has to offer, and then go out and enjoy the water with confidence and convenience.

IS YOUR BOAT COMPLIANT?

Springfield Marine Company

is a proud member of these associations and subscribes to the standards and practices which they set forth.

The American Boat and Yacht Council (ABYC) has recommended marine industry seating safety standards for pedestal applications into two separate categories as follows:

Class A Seat designed for occupancy while the boat is underway at any speed.

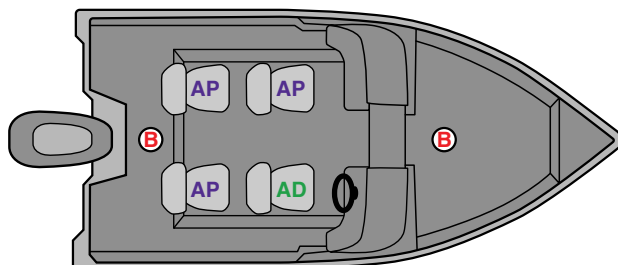

Class B Seat designed for occupancy only at boat speeds not exceeding five miles per hour (fishing or trolling).

All pedestals must pass a series of tests within each of these classifications which include horizontal and vertical impacts, torque, static load, fatigue, and fastener pull testing.

There are two types of Class A seating designations:

Class AP - Passenger Seat mount must resist 30 foot pounds of torque (non-locking).

Class AD - Driver Seat mount must incorporate a "mechanical interference lock" and resist 150 foot pounds of torque (locking).

Class B

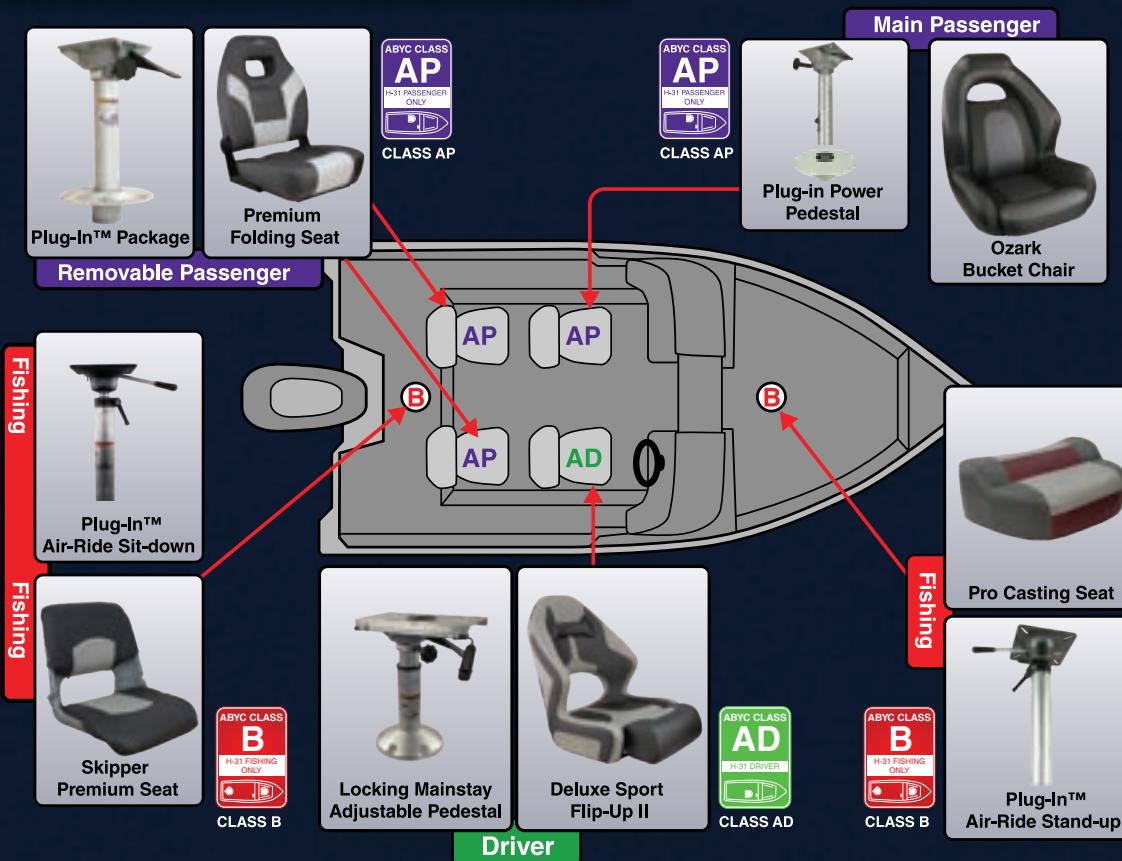

Class AP

Class AD

Look for these labels to identify the ABYC H-31 Classifications Springfield Marine Company has been a leader in establishing and complying with these ABYC recommended standards.

IN ORDER TO COMPLY WITH THESE STANDARDS, SPRINGFIELD COMPONENTS MUST BE COMBINED WITH OTHER SPRINGFIELD PARTS. MIXING SPRINGFIELD PARTS WITH NON-SPRINGFIELD COMPONENTS VOIDS THESE STANDARD CLASSIFICATIONS.

Example of multiple parts on typical model boat
